

Loss Prevention Solutions for Grocers

Every dollar spent in grocery needs to matter. Beyond this highly competitive industry's razor thin margins, grocers can be plagued with internal collusion, external theft, organized retail crime, etc. Sometimes, loss prevention efforts go by the wayside, since every dollar spent must produce an ROI.

Furthermore, federal and state restrictions mandate strict compliance in regarding food safety, alcohol & tobacco sales, and those with in store pharmacies must abide by DEA regulations when distributing controlled substances.

In today's environment, most loss prevention departments have oversight of these high risk areas. But, resources often get allocated elsewhere, making loss prevention a concept and not an initiative. So, this begs the question, who's responsible for:

- Reducing Shrink
- Protecting Margins
- Preventing & Resolving Theft Issues
- Controlling Inventory & Waste
- Ensuring Regulatory Compliance
- Expanding Your Loss Prevention Reach
- Complying with Food & Workplace Safety Regulations

Retail Integrity Solutions does not operate in a silo. We live and breathe loss prevention and asset protection across the many facets of retailing. Our foundation is experience that matters.

Retail Integrity Solutions provides grocers and food retailers with industry-specific solutions to help control shrink, protect margins, and avoid steep fines. Developed to work hand in hand with your corporate culture, operators, and existing loss prevention department.
